## Dataset: User Information

The **All\_Users** table contains the master records of PhonePe users. This dataset serves as the primary user reference for transaction analysis and helps identify customer demographics and account information.

## Dataset Description

This sheet stores essential user details including unique user identifiers, customer names, age, and account joining dates. These fields are used to establish relationships with transaction tables and support user-based analytics.

| Column Name | Description                                     |
|-------------|-------------------------------------------------|
| User_ID     | Unique identifier assigned to each PhonePe user |
| Name        | Registered customer name                        |
| Age         | Age of the customer                             |
| Join_Date   | Date when the customer registered on PhonePe    |

## Purpose

- Maintains master user records.
- Acts as the primary lookup table.
- Enables customer-based transaction analysis.
- Supports relationship modeling within Power BI.

## Dataset: All Transactions

The **All\_Transactions** table combines transaction records from all PhonePe services into a unified dataset. It provides a consolidated view of customer activity across Insurance, Loans, Money Transfer, and Recharge & Bills.

## Dataset Description

Each row represents a unique transaction and contains information about transaction amount, service category, payment status, failure reason, and transaction date.

| Column Name    | Description                          |
|----------------|--------------------------------------|
| Transaction_ID | Unique transaction identifier        |
| Amount         | Transaction amount                   |
| User_ID        | User performing the transaction      |
| Service        | PhonePe service used                 |
| Service Type   | Category within the selected service |
| Payment_Status | Successful or Failed                 |
| Reason         | Failure reason (if applicable)       |
| Date           | Transaction date                     |

## Purpose

- Provides centralized transaction analysis.
- Enables KPI calculations.
- Supports dashboard filtering.
- Used for monthly trend analysis.

## Recharge & Bills Dataset

This dataset stores recharge and utility bill payment transactions processed through PhonePe.

## Recharge Categories

- Mobile Recharge
- Electricity Bill
- DTH
- Cable TV

| Column         | Description               |
|----------------|---------------------------|
| Transaction_ID | Unique transaction number |
| User_ID        | Customer identifier       |
| Recharge_Type  | Bill or recharge category |
| Amount         | Recharge amount           |
| Date           | Transaction date          |
| Payment_Status | Successful or Failed      |
| Reason         | Failure reason            |

## Purpose

- Compare recharge categories.
- Analyze monthly payment trends.
- Evaluate customer payment behavior.
- Track payment failures.

The Loans dataset stores loan-related transactions including multiple loan categories.

## Columns

- Transaction\_ID
- User\_ID
- Loan\_Type
- Loan\_Amount
- Date
- Payment\_Status
- Reason

## Purpose

- Analyze loan disbursement.
- Compare loan categories.
- Identify payment failure patterns.
- Monitor monthly loan trends.

## Money Transfer Dataset

The Money Transfer dataset records all peer-to-peer and account transfer transactions processed through PhonePe.

| Column         | Description               |
|----------------|---------------------------|
| Transaction_ID | Unique transaction number |
| User_ID        | User identifier           |
| Transfer_Type  | Transfer method           |
| Amount         | Transfer amount           |
| Date           | Transaction date          |
| Payment_Status | Successful or Failed      |
| Reason         | Failure reason            |

## Purpose

- Monitor transfer volume.
- Evaluate payment performance.
- Analyze transfer methods.
- Identify transaction failures.

## Insurance Dataset

The Insurance dataset records insurance premium transactions performed through PhonePe.

## Columns

- Transaction\_ID
- User\_ID
- Insurance\_Type
- Premium
- Date
- Payment\_Status
- Reason

## Purpose

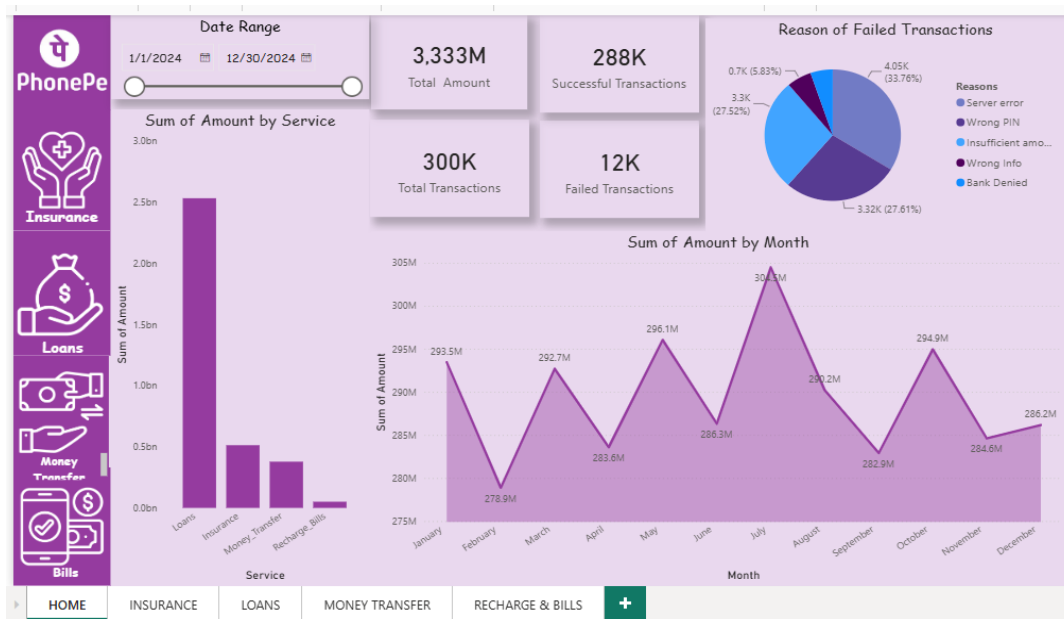

- Analyze premium collection.
- Compare insurance categories.
- Monitor payment success and failures.

# Project Overview

**Objective:** Build an interactive Power BI dashboard to analyze PhonePe transactions and generate business insights.

**Business Problem:** Understand transaction trends, monitor KPIs, identify payment failures, and evaluate service performance.

**Dataset:** Excel dataset containing approximately 50,000 transaction records with payment details.

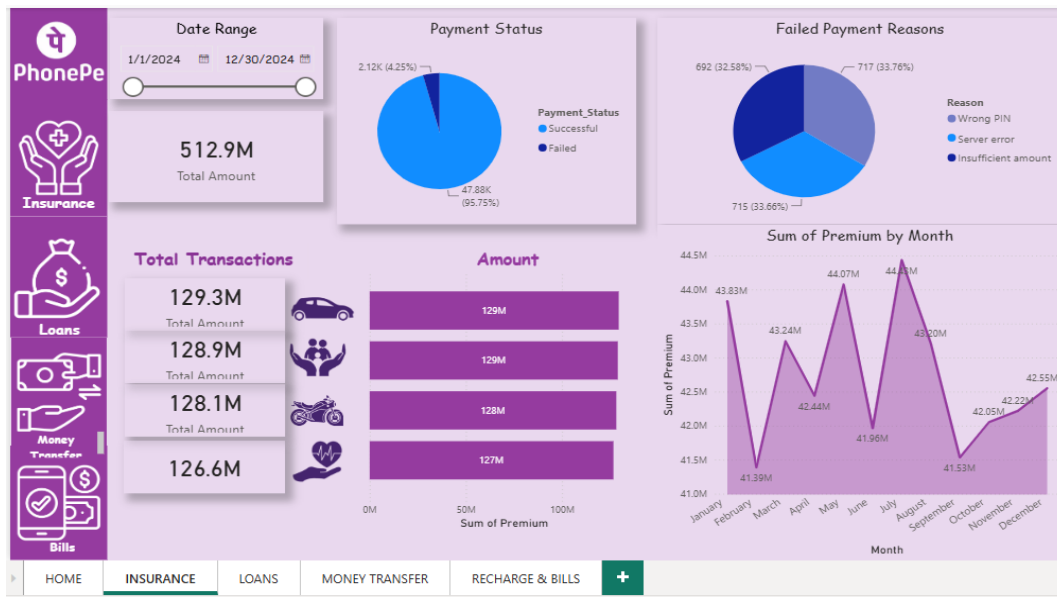

# Dataset & Dashboard Development

Dataset Columns: Transaction ID, User ID, Service Category, Amount, Date, Payment Status, Failure Reason.

Data Cleaning: Removed duplicates, corrected data types, handled missing values, transformed date fields, and created Month column.

Power BI Features: Power Query, DAX Measures, KPI Cards, Filters, Slicers, Bar Charts, Pie Charts, Area Charts.

Dashboard Pages: Home, Insurance, Loans, Money Transfer, Recharge & Bills.

# Dashboard Analysis

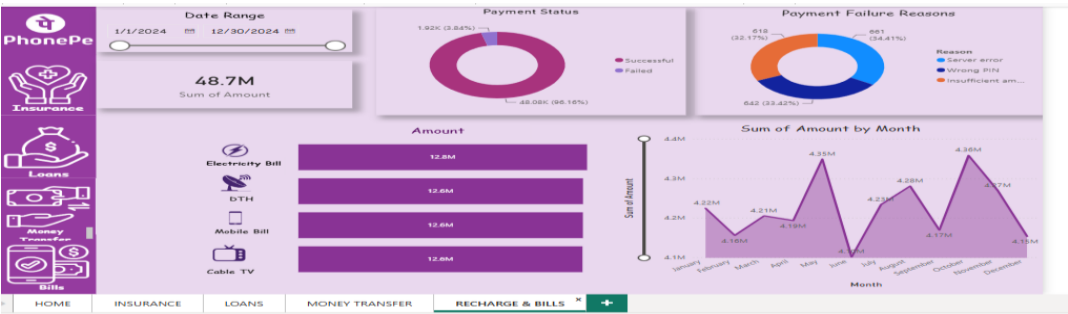

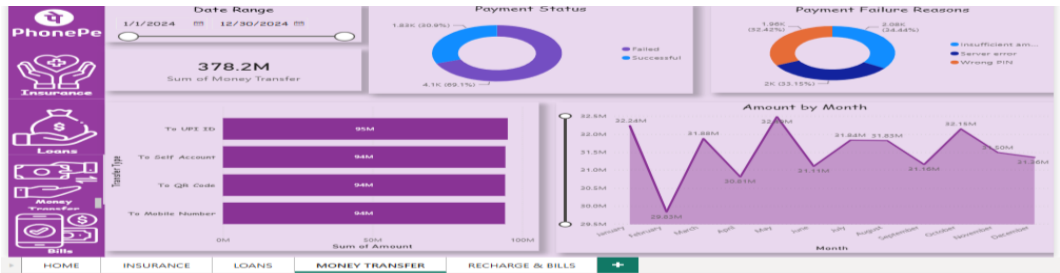

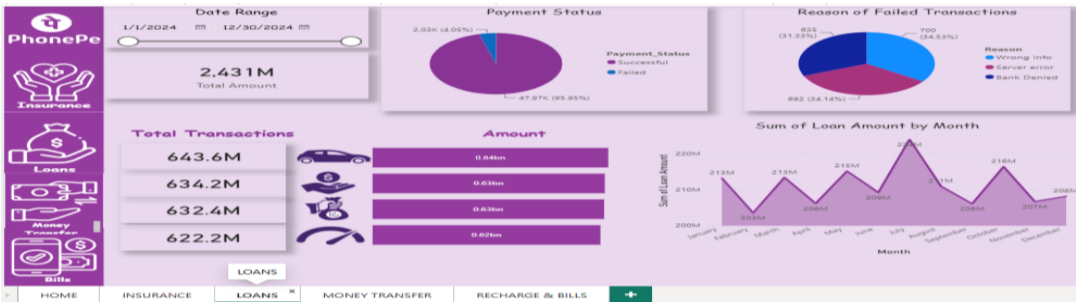

Home Dashboard provides an overview of transaction amount, success rate, failed transactions, and service-wise performance.

Insurance Dashboard analyzes premium collections and payment status.

Loans Dashboard evaluates loan amount trends and payment success.

Money Transfer Dashboard tracks transfer performance and monthly trends.

Recharge & Bills Dashboard compares bill payment categories and monthly analysis.

# Key Insights & Business Recommendations

Over 95% of transactions were completed successfully.

Loan services contributed the highest transaction value.

Major failure reasons include Wrong PIN, Server Error, Bank Declined, and Insufficient Balance.

Monthly trend analysis highlights seasonal transaction fluctuations.

## **Recommendations:**

- Improve server uptime during peak hours.
- Reduce transaction failures through stronger validation.
- Optimize banking integrations.
- Monitor customer behavior for targeted improvements.

# Conclusion

This project demonstrates end-to-end data analytics using Excel and Power BI. It showcases skills in data cleaning, transformation, KPI development, visualization, and business insight generation.

## **Skills Demonstrated:**

- Excel
- Power BI
- Power Query
- DAX
- Data Cleaning
- Data Visualization
- Dashboard Design
- Business Analytics
- KPI Reporting
- Trend Analysis

## **Project Deliverables:**

- Excel Dataset
- Power BI Dashboard
- Interactive Visualizations
- Business Recommendations
